AeroBook

System Use-Case & RBAC Governance Model

Actor Role Boundaries, Operational Capabilities, Permission Matrices & Third-Party Integrations

SPEAKER TALKING POINTS

- Role Partitioning: Strict boundaries isolate Passengers (ROLE_USER), Airport Staff (ROLE_STAFF), and Admins (ROLE_ADMIN).
- Departure Gate Integration: Staff operates digital gate scanner (/verify) that directly transitions passenger status to BOARDED.
- External Collaborators: Razorpay handles order payments; Gmail SMTP dispatches vector PDF boarding passes and OTPs.
